

We are a Planetarium and Science Center of Municipality of the Greater Gaziantep, which is the 6 th biggest metropolitan city of Turkey, located on the board of Syria, with a population over 1.5 million.

We have been open to public since 25 th of December 2010 and working 7/365 days a week/year.

Our center was established in the biggest park of our city and it has approximately 3.500 m² closed area, four storeys including basement and ground floor and nicely decorated garden, 1.500 m² in area.

Our planetarium dome is 10.6 m indiameter with 77 seats capacity. It is the first and the biggest immobile/permanent planetarium open to public. Our dome is equipped with ZKP4 star optik projector and 5 Channel full dome digital projectors. Our planetarians present Sky shows by means of analog and digital projectors and play full-dome films.

We also have a science center with 75 hands-on exhibits. Our projects going on or done:

- The scientist of the month, starting with Sir Isaac Newton, in December 2011, supporting

videos and/or dramas,

- Interactive lessons by hands-on exhibits,
- Interactive astronomi lessons in fulldome
- Semester Science Workshops, January 2012
- Collaboration with Gaziantep University, Engineering Faculty, Electrical and Electronics and Physics Departments, for Social Awareness Project.

Finally, we have a Robot Theatre show, 2 Robothespians, who are very talented robots.
